

Please reject the NAB's petition of 04-160, XM radio is a new expansion of a wonderful approach to clear uninterrupted radio, coverg all of the United States. A driving trip can now include being informed of the weather and traffic as you enter a major city.....continuously! Allowing me to make changes or alteringmy plans to best fit the traffic and weather reported. All this done without having to search through countless unknown radio stations, and wading through endless commercials as are offered on the regular radio stations. Thank you so much for your consideration of supporting XM radio's right to keep me continuously informed.
